## ABOUT US

At TYSA de México we are a certified company with ISO 9001: 2015, experts in manufacturing and automation of manual and automatic valves applied to any type of fluid that flows in the industry.

We provide consulting and valve maintenance services and designs solutions in the proper use of materials and products.

Also includes a continuous improvement in our process. We offer solutions at the following Industries: chemical, water treatment, food, beverages, mining, water services, energy, sugar, refrigeration, textile and fertilizers.

## OUR BRAND

LAVSA represents the effort of a Mexican company that equals and surpasses the best recognized quality, putting it at the service of the industry.

Our design proposes the resolution of valve situations. We solve and avoid with the selection of material sudden maintenance properly and product contamination.

Our manufacturing process begins with personalized advice, material selection, tests in accordance with International Standards, technical training and after-sales service.

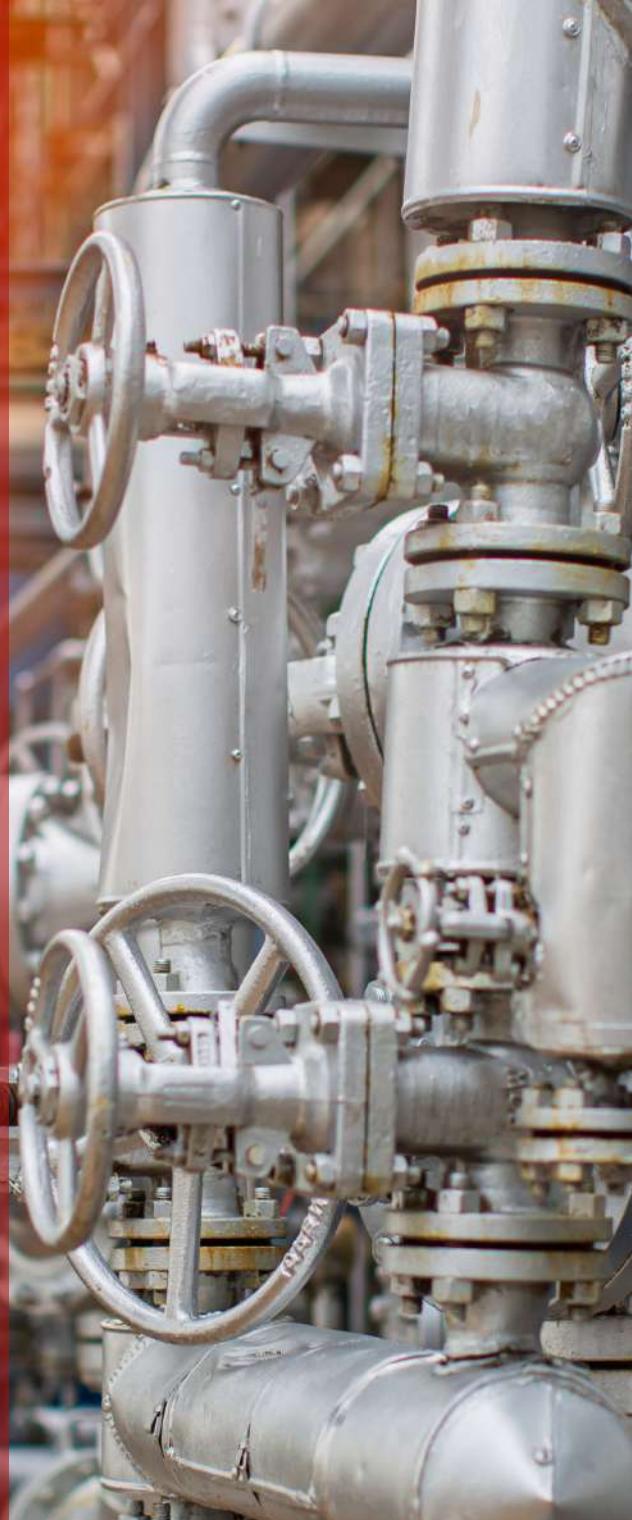

# BENEFITS

We have specialized equipment for the manufacture of equipment and certified personnel to guide the client in the correct choice valve in order to specify the type of instrument that suits the circumstances you request.

In addition, according to the information provided and under the specifications of our clients, we propose a solution to their daily situations from the design, manufacture, assembly, hydrostatic tests to the technical training of valves.

The manual and automatic valve manufacturing service goes through processes that allow us to obtain a complete view of its function: computer design, model manufacturing, casting and machining of parts to proceed with assembly, testing and finishing.

In the case of maintenance service, our staff supervises each of the industrial processes to ensure the accuracy and reliability of the instruments we rehabilitate. We provide this service in the field. Our technicians go to your facilities or specific work areas, to properly perform preventive, corrective and repair maintenance of valves.

# VALUES

▶ **VISION**

To be recognized as the leading company in Valve Manufacturing in Mexico and in the world.

▶ **MISSION**

Manufacture valves to meet customer needs in compliance with standards.

▶ **VALUES**

Responsibility, passion, integrity, quality, innovation, persistence, honesty and advice.
